

About me

Hello! My name is Zhang Cheng, and I am a highly skilled and experienced full-stack web developer with a strong focus on delivering exceptional user experiences and driving business value. With over 6+ years of experience in the industry, I have developed a wide range of web applications for clients worldwide. As a dedicated and creative developer, I specialize in frontend development and have a proven track record of building highly responsive, user-friendly websites and applications. I am passionate about delivering clean, scalable, and maintainable code, and I always prioritize timekeeping to ensure timely project delivery. I have had the opportunity to work with top organizations in the UAE, UK, Canada, and China, and I have successfully satisfied clients with my diverse skill set. My expertise lies in developing web applications such as E-Commerce Systems, Enterprise Apps, Single Page Applications, Health Care Systems, Learning Management Systems, and Social websites. When starting a new project, I believe in effective communication with clients to fully understand their needs and vision. This allows me to deliver tailored solutions that meet their expectations. I am excited about new opportunities to expand my skill set and contribute to innovative projects. If you are looking for a dedicated and talented web developer, I would love to discuss how I can contribute to your team or project.

Education

From April 2011
to March 2016

Interests

Engaging in sports such as volleyball and ping pong not only provides a fun and active way to spend my time but also offers numerous physical and mental benefits. Additionally, listening to music during my free time can be a great way to relax and unwind, allowing me to escape into a world of melodies and lyrics that resonate with my emotions.
